## **PROJECTS IMPLEMANTATION REPORT TERM 1- 2022**

SFRIM was informed by Tusaidiane Uganda about our intention to implement different projects through the intervention letter. In 2022 before we could complete the requests, SFRIM sent money for adding computers in the computer lab, term 2 SFO, sanitary pads, scholastic materials for 38 students and the renovation plan 2022 term 1.

As soon as the money reached on the Tusaidiane account, we handed in an implementation plan to Tusaidiane which was approved and money was sent to the school for project implantation.

The head teacher embarked on contacting the electrician to extend the electricity to locations which were not connected to electricity like the dinning, both boys' and girl's toilet, among others. The solar panel was installed to increase the solar electricity and batteries were refilled.

The major renovation was the repairing of the bathroom wall which had a cruck in the wall, this was done and painting of the toilet was also done. Battery refilling, window panes, swing repairs, furniture repairs and repair of holes in the fence was done from the school budget, 6 computers were placed in the computer lab to increase the number of computers hence to increase the ratio of pupils per computer. The secretary's computer was also bought and placed in her office.

Scholastic materials for 38 students were distributed to the neediest, they received pens, pencils, sets and books. The pupils and parents were very excited about this support. Among the 38 students there was 6 students who reported back to school late, they come from the same family and their parents are among the less privileged in the community, they each had two books and one pen and they were using it for all the subjects taught in class, now they can write their different subjects in different books, they now attend school and write in the new exercise books.

The objectives of the projects were achieved like;

- Increased productivity of teachers as they will use technology tools in many cases for teaching and learning e.g., in research
- Improved communication with the outside world
- Introduce the pupils to the basic components of a computer and the software on a computer

- Save time as many pupils will have access to the computers at the same time instead of studying in shifts.
  - Well maintained school and property
  - Improved learning and attendance for pupils and students.
- Receipts and accountabilities are already sent to TUL our trustee.

*Happy new pupils with scholastics*

*Electricity extension to the toilets*

*New paint in the girls' toilet*

On behalf of the entire community of Mannya and St. Francis Little Birds Nursery and Primary School in particular, I take this opportunity to extend my great thanks to all our beloved Donors in German and The Netherlands through Tusaidiane Uganda Ltd for your continued, tireless and endless support towards SFLBNPS, may the almighty reward you in all your endeavours.

Best regards  
Mutaawe Godfrey  
Head teacher
