23 MARCH 2016

6TH PROGRESS REPORT ON SCHOOL CONSTRUCTION ST FRANCIS LITTLE BIRDS

On 22 February the school year has started! All buildings from the BMZ project were ready.

THE BMZ – SFRIM CONSTRUCTION PROJECT FOR FRALIBI CDA

- Vocational Rooms
- Boys Dormitory
- Girls Dormitory
- Fence & gate

VOCATIONAL ROOMS – 100% ready

The first tailoring machines are there. In the week before Easter the room will be used for training of girls and village women in making their own re-usable sanitary pads.

The sets of carpentry tools have been delivered. They are stored in special boxes, which can be locked. Tools will be given out after signing for the use.

BOYS & GIRLS DORMITORIES – 100% ready

Toilet, rainwater harvesting tank and small stones between the Girls Dormitory and toilet to reach without muddy shoes

The interior of the Girls Dormitory with brand-new proper beds and bed-nets against the mosquito's (malaria)

Also the Boys Dormitories and toilets can be reached through paths with small stones in order to prevent dirty class rooms or dormitories because of muddy environment.

In general we have used small stones to beautify the school compound and to care that pupils, parents, teachers and visitors can reach the school with clean shoes.

THE SFRIM FUNDED EXTRA CONSTRUCTION ACTIVITIES FOR FRALIBI CDA

- Anti-flooding provisions
- Kitchen
- Dining Hall
- Underground water storage tank

ANTI-FLOODING PROVISIONS – 95% ready

The compound of St. Francis Little Birds Nursery & Primary School is highly sloping with the original school at the low side of the slope. Flooding of rainwater towards and into the school is normal. SFRIM HAS AVAILED € 5.000 FOR THE CONSTRUCTION OF A FLOODING WALL, BOTH AT THE FRONT-SIDE (existing buildings) AS AT BACK-SIDE (new buildings) OF THE SCHOOL.

The Front-side with steps to enter the school.

The playground in front

The provisions in front of the Vocational rooms

Front

A retainer wall has been constructed over the full width of the compound (ca. 50 meters) in order to keep the rainwater out of the school.

The water will be guided by the wall to flow off to the left and right side of the compound.

In the middle of the wall steps were constructed for the pupils and visitors to reach safely the Administration.

Back

In front of the vocational rooms a retainer wall prevents the water to flow in the rooms.

The rainwater flows around the building through channels to the back-side of the vocational rooms.
